Imagine being in charge of a system where you own the product. You do not own the software and the hardware is proprietary. You need to coordinate with multiple vendors for any updates or modifications and you are under strict government regulation. By the way, the product has a lifespan of 20 - 30 years. Welcome to the world of aviation cybersecurity, where safety and security live together. At a high level, this presentation will cover what is aviation cyber security, the unique challenges it represents and why the industry is captivating.

Speakers**Olivia Stella**

Aviation Cybersecurity Analyst, American Airlines

Olivia Stella is an aviation cybersecurity analyst for American Airlines. In her current role, she focuses on aviation security and vulnerability management including pen testing and coordinated disclosure. She has over ten years of experience in software development and information...
